

M6 HIGHWAY

RELEVANCE

SECTOR

PROCUREMENT

Construction of the M6 highway

KEY STATS

The M6 motorway crosses / passes

2 COUNTIES
3 TOWNS
11 VILLAGES

Construction of the

25 KM LONG

and last section of the M6 motorway to connect it with the Croatian border

Expected reduction of fatal accidents on this road after completion of the works by

45-65%

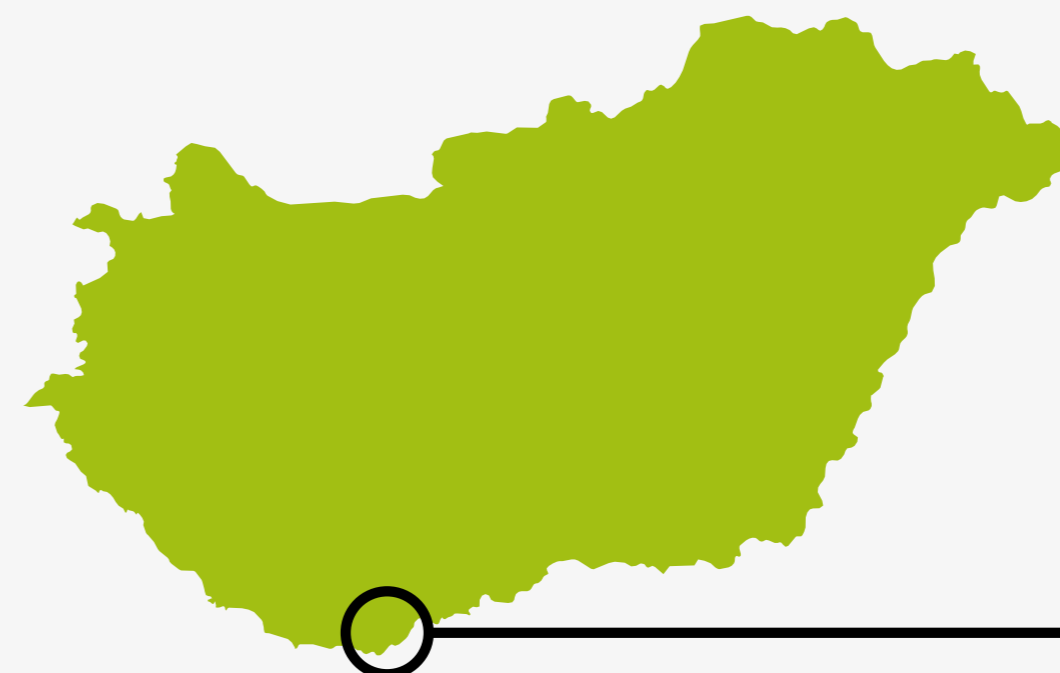

Expected reduction of serious injuries by

45-55%

PROJECT

LOCATION

HUNGARY

Bóly / Ivándárda

TIMELINE

COSTS

€ 160 MILLION ORIGINAL COST

EU funds: €160 million

MONITORING REPORTS

DOWNLOAD

the first monitoring report at:

http://transparency.hu/wp-content/uploads/2020/03/TI_jelentés_final.pdf

MAIN RECOMMENDATIONS

- The contracting authority (CA) should lower the estimated price of the project to avoid overpricing. Thanks to this recommendation, which was taken on board, 200 million HUF were saved (around 600.000 EUR).
- The CA should lower the requirements for reference works and the experts' professional experience in order to open up competition. Taken on board.

IRREGULARITIES

- A potential concerted action (i.e. cartel) among the three bidders. The Competition Authority conducted a follow-up examination, but no formal investigation was launched.

WHAT'S NEXT?

- Monitoring the second tender (construction works)
- Examining the bids
- Background checking on the bidders
