

# ENERGY RENOVATION OF HOSPITALS

## RELEVANCE

### SECTOR

### PROCUREMENT

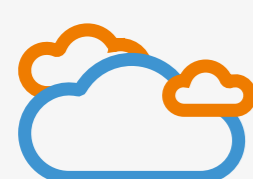

Energy renovation of public hospitals in Trbovlje and Novo mesto

### EXPECTED # OF BENEFICIARIES

**TRBOVLJE:** 57,466 (2016 data)

**NOVO MESTO:** 132,000 (2019 data)

### KEY STATS

**15,2 MILLION TONS**

of CO<sub>2</sub> were emitted into the air in Slovenia in 2016

14.6 million tons in 2015

**32,7%**

of CO<sub>2</sub> emissions in 2016 originated from electricity, gas, steam and air conditioning supply

## MAIN RECOMMENDATIONS

- A more thorough evaluation of the investment impact.
- Tighten contractual provisions on deadlines, not allowing extensions for predictable circumstances. Recommendation taken on board by the contracting authority.
- Analyse single-bidding trends.

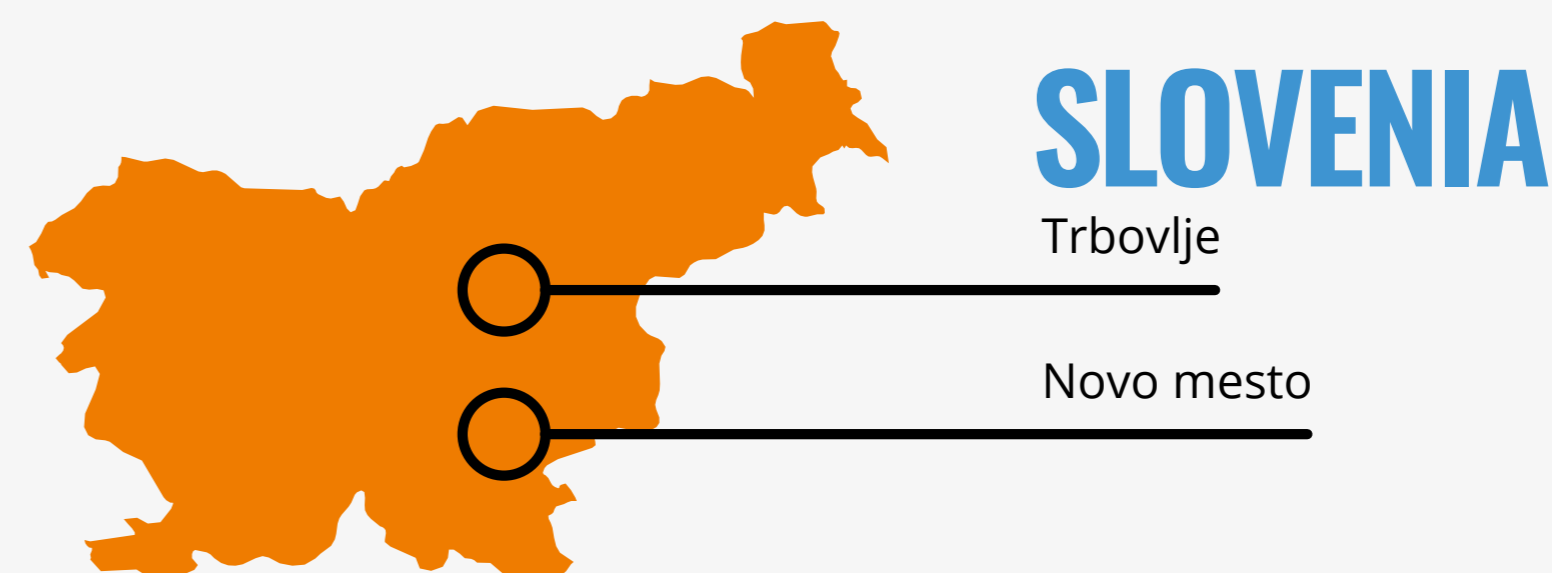

## MONITORING REPORTS

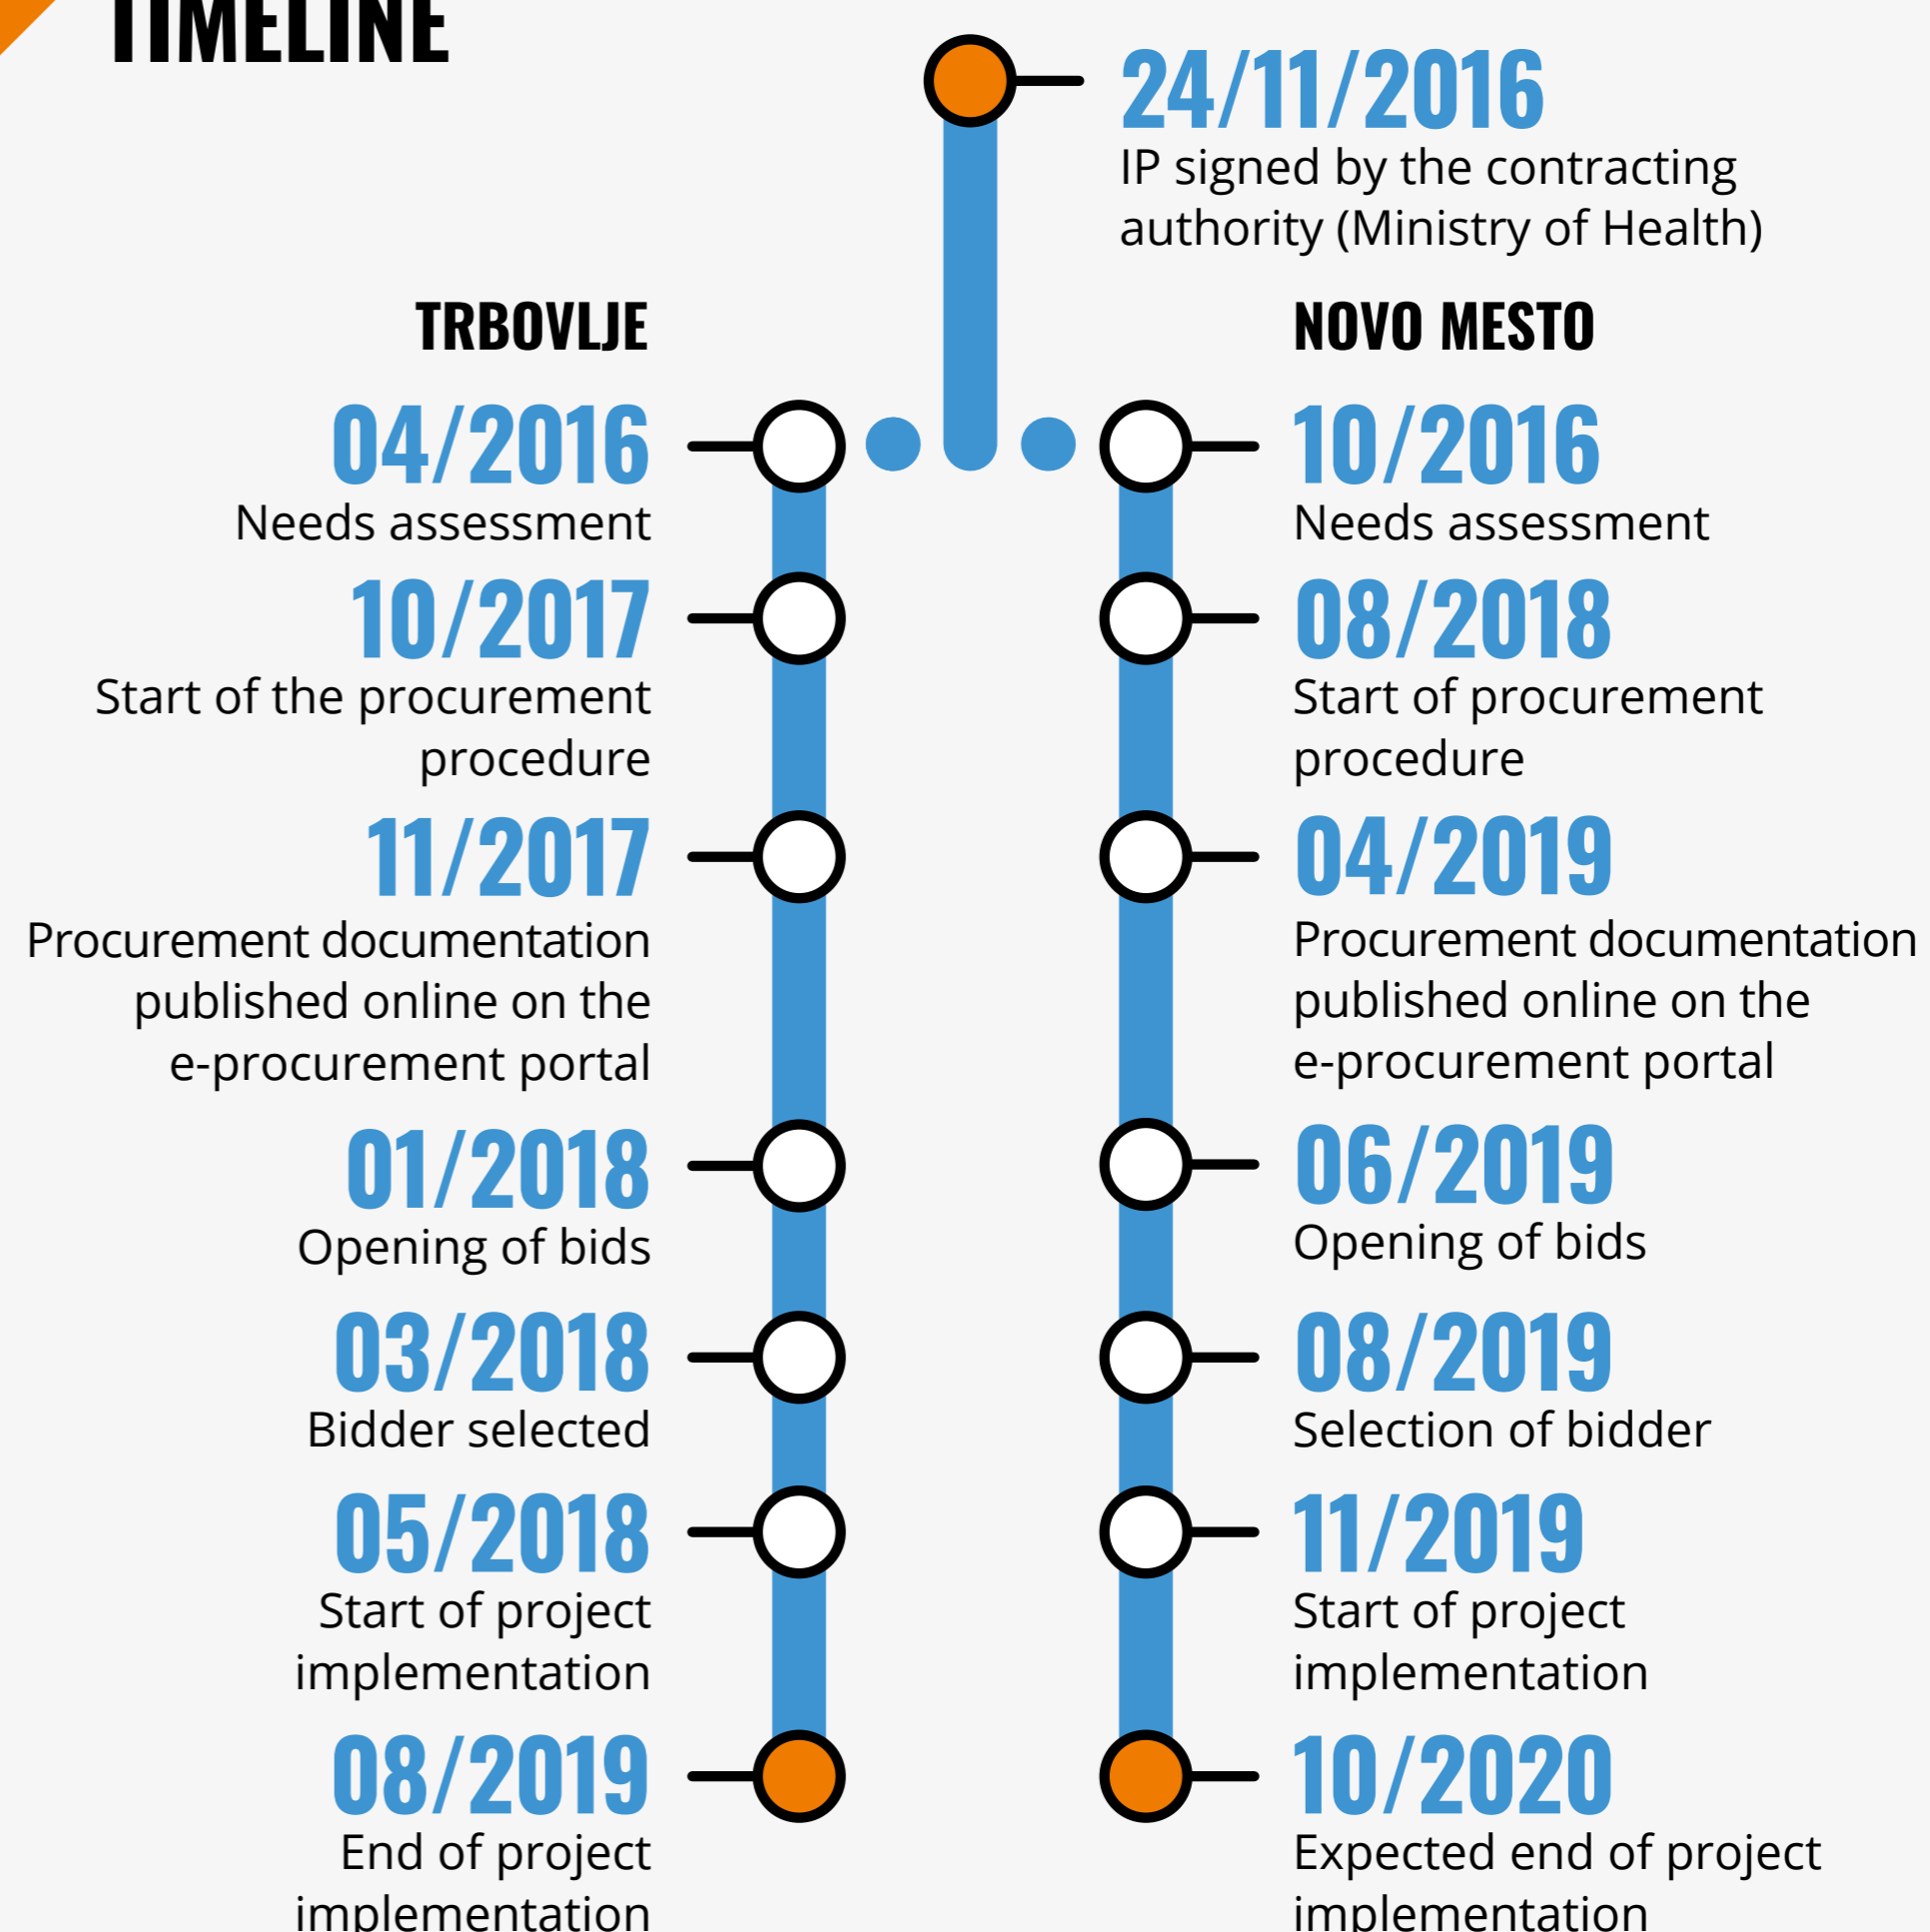

**DOWNLOAD**  
the periodic monitoring reports at:  
<http://pakt.transparency.si/dokumenti/>

## PROJECT

### LOCATION

### TIMELINE

### COSTS

**TRBOVLJE: € 2.5 MILLION**  
**NOVO MESTO: € 1.3 MILLION**

## WHAT'S NEXT?

- Monitoring the renovation of Novo mesto general hospital
- Disseminating key information to affected communities
- Analysing and addressing detected systemic inadequacies
