The Business of a Better World

What is MACN?

- MACN is a **global business network** working towards the vision of a **maritime industry free of corruption** that enables fair trade to the benefit of society at large.
- Established in 2011, MACN is comprised of **vessel owning companies** within the main sectors of the maritime industry and **other companies in the maritime industry**, including cargo owners and service providers.

Shipping: A key part of global trade

- **Shipping makes a positive contribution to countries' economic development:**
 - 90% of all cargo is transported onboard ships
 - Shipping is the safest and most environmentally-responsible way to transport goods
- **Shipping is an anonymous and complex part of the trade chain:**
 - Dispersed operation
 - Highly regulated
 - Operates in many different jurisdictions
- **Shipping is also a risky business:**
 - Frequent and multiple contacts with government officials makes it prone to corruption risks
 - Risks of delays, safety for the crew and ship, and commercial pressure leave shipping vulnerable to corrupt demands
